Exponent is a leading engineering and scientific consulting firm. Our multidisciplinary team of scientists, engineers, physicians and regulatory consultants brings together more than 90 different disciplines to solve complicated problems facing corporations, insurers, government entities, associations and individuals. Our approximately 1000 staff members work in 26 offices across the United States, Europe and Asia. Exponent has over 800 consultants, including more than 500 that have earned a doctorate in their chosen field of specialisation.

Exponent's European **Chemical Regulation & Food Safety Centre** specialises in timely high-quality, creative, and practical solutions to problems that affect our clients ability to conduct business globally. Our experienced staff include both technical and regulatory consultants who are experienced in dealing with pesticide and non-pesticidal products including conventional chemicals, biochemicals, biocides, cosmetics, consumer products and products of biotechnology and with foods, food ingredients, and nutrition.

We are currently recruiting for a **Head of Toxicology** to join our team, based in the UK or Europe with regular travel to our Harrogate, North Yorkshire office.

Responsibilities for this position include:

- Leading a diverse team of experienced toxicologists, working across plant protection products, biocides, industrial chemicals, foods, consumer products and occupational health
- Providing high quality technical scientific and regulatory advice
- Project management and the delivery of finished documents to support registrations in Europe and a range of other countries
- Building and developing successful client relationships
- Actively market expertise and identify potential new opportunities for Exponent

Criteria for this position:

- A minimum of a BSc in chemistry, biology or closely related field. However, a professional qualification or higher degree in toxicology is preferred
- Knowledge of European regulatory frameworks relating to plant protection products, industrial chemicals, and classification; the associated European guidance documents, OECD test guidelines, and principles of GLP; an appreciation of future regulatory policy evolution would be an advantage
- An internationally recognised authority in one or more of the following areas: Carcinogenicity, genotoxicology, reprotoxicology/endocrinology, immunotoxicity, neurotoxicity
- Proven experience of data interpretation and problem solving, gained in a relevant industry
- Excellent written and communications skills
- Experience of effective staff management and team development
- Proven experience of business development is desirable.

Exponent International, Ltd. is an Equal Opportunity Employer.
