

SafeBridge Announces the **TAK SCHOLARSHIP PROGRAM**

SafeBridge regularly conducts its premier training, the Potent Compound Safety “Boot Camp”® at sites across the U.S. and the globe. This three-day course in potent compound safety is designed for EH&S professionals, including toxicologists and industrial hygienists, who need to understand the critical concepts of evaluating and safely handling pharmaceutical compounds.

Apply Today!

info@safebridge.com

Awardees are invited to attend the following **Potent Compound Safety “Boot Camp”®**. The scholarship includes the cost of the training and meals. Travel to the venue and hotel costs are not covered.

The TAK Scholarship honors Dr Tracy A Kimmel DABT, a valued SafeBridge colleague and exceptional toxicologist who unexpectedly passed in October 2021. The TAK Scholarship facilitates the training of exceptional graduate students and/or postdocs interested in developing skills in pharmaceutical risk assessment, by attending a Potent Compound Safety “Boot Camp”®.

The intensive curriculum, taught by industry leaders, focuses on:

- ▶ Evaluation of compound potency and toxicity
- ▶ Sampling and monitoring protocols
- ▶ Control technologies
- ▶ Effective investigation and communication approaches

Through lectures, case studies, videos, and exercises that address potent compound safety issues in pharmaceutical discovery, development, and manufacturing. The course leverages a systematic approach to successfully support drug R&D and manufacturing operations.

Eligibility

- ✓ Graduate Students and Postdocs in the field of Toxicology and/or Industrial Hygiene.

Requirements

- ✓ Please submit your Curriculum Vitae along with a brief personal statement describing the potential applicability of this training towards your career goals.
